I myself have used SmartPageRank.com to analyze my site and it has been a great tool to check the Page Rank from multiple datacenter. It displays no. of backlinks in Google, Yahoo, MSN, Dmoz Links with Alexa traffic ranking. Moreover the tool also estimates the market value of your site & will automatically send email if PR gets updated.

The acronym "SEO" can refer to "search engine optimizers," a term adopted by an industry of consultants who carry out optimization projects on behalf of clients, and by employees who perform SEO services in-house.

I use the free edition of Rank Tracker and it's really helpful:

<http://www.link-assistant.com/rank-tracker/>

You can choose to track your ranking score in Google, Yahoo, Bing, Aol, Ask.com, Altavista, Excite, Lycos etc. and also in their local sites for the different countries in the world

There is no limit for the number of keywords you will track
