
guaranteed 1st placement on 40 major search engine

Posted by david Rivera - 2008/05/29 14:44

I was surfing the net doing my daily SEO research when I came upon this website that guaranteed 1st placement on 40 major search engines, including Google. Not only that, they said it is FREE! I immediately said SCAM! They said that they don't use any blackhat techniques and you will never get banned. Does anyone know if there is some truth to this statement

If you see any product or service claiming to take your offer to more than a million people overnight, let me tell you now, it ain't gonna happen. and yeah it is too good to be true:)
